The Doctor of Business Administration (DBA) in Information Systems program at Cleveland State University is a research-oriented degree program dedicated to preparing students for an academic career in teaching at the college or university level. The program focuses on enabling students to conduct research that is theoretically sound and relevant to practice. Students will also be provided opportunities for developing inter-disciplinary research skills. The program is designed to support both full-time and part-time students and allows for timely completion of the degree by all students.
