

## MSN: Nursing Education

This program provides nurses with the opportunity to acquire the skills needed for the teaching and clinical supervision of nursing students. Graduates are prepared to teach and clinically supervise nursing students in the care of specifically identified populations in educational settings, such as healthcare facilities or academic environments. Students enroll in core Population Health courses as well as specialized courses focusing on nursing education: curriculum design and development, instructional design, faculty and student roles, and the evaluation and supervision of nursing students.

### Program of Study

A minimum of 39 semester hours of study is required. Courses include

NUR 501	Introduction to Population Health Nursing
