

Cleveland State University

Lecture & Discussion

The Department of Teacher Education hosts James Zull, PhD
“Teaching and the Brain”

Wednesday, December 2nd

Mather Mansion, Ballroom

4:00- 5:30 pm **event is free*

Teaching for over 40 years, Dr. James Zull bridges the gap between neurobiology and pedagogy and exudes an unequivocal passion for learning, teaching and the sciences. Author of “The Art of Changing the Brain: Enriching the Practice of Teaching by Exploring the Biology of Learning” (2002), Dr. Zull joins CSU to discuss the brain’s learning cycle and its application by teachers and professors.

“We have brains precisely in order to be able to learn, to adapt to new environments. This is essential throughout life, not just in school. We now know that every brain can change, at any age. There is really no upper limit on learning...”

All interested CSU students & faculty are welcome!

*Those interested in Teacher Education as well as any student or faculty member seeking to improve their learning & teaching skills are encouraged to join!

**Light refreshments to follow.*
