

DEAN
Fenn College of Engineering

Cleveland State University invites applications and nominations for the position of Dean of the College of Engineering. The new Dean will guide the College's efforts to become a leader in research and education in engineering, collaborate with and engage local industry, attract philanthropic investment and support the University's mission of engaged learning.

Founded in 1964, Cleveland State University is a public research institution that provides a dynamic setting for engaged learning. With an enrollment of more than 17,000 students, 8 colleges and more than 200 academic programs, CSU provides a hands-on learning environment that connects faculty and students, ideas and real-world experience. With more than \$500 million in new construction and building renovations, Cleveland State has developed a 21st century campus for the student of today and tomorrow.

The Fenn College of Engineering was founded in 1923 and consists of the departments of Chemical & Biomedical Engineering, Civil & Environmental Engineering, Electrical & Computer Engineering, Engineering Technology, and Mechanical Engineering. The College offers 9 master's degree programs. A college-wide interdisciplinary Doctorate in Engineering degree is also available, including a specialization in Applied Biomedical Engineering (in conjunction with the world-renowned Cleveland Clinic).

CSU continues its mission to encourage excellence, diversity, and engaged learning by providing a contemporary and accessible education in the arts, sciences, humanities, and professions, and by conducting research, scholarship, and creative activity across these branches of knowledge. CSU endeavors to serve and engage the public, support faculty to do outstanding research, and prepare students to lead productive, responsible, and satisfying lives in the region and across the globe.

Applications and nominations may come from the academic, public, private, government, or non-profit sectors. The successful candidate will possess a doctoral degree in engineering or a related field, and will also have a proven record of leadership, collaboration, and broad experience. They should also possess strong entrepreneurial and development skills and a commitment to diversity. While applications and nominations will be accepted until a new Dean is selected, interested parties are encouraged to submit their materials to the address below by January 6, 2012 to assure full consideration.
