

Citizen leadership skills in a diverse society are developed through theory and service learning. Students with an interest in Social Work are provided an opportunity to explore theoretical and practical knowledge about the social work profession. You will examine purposes, values, ethics, knowledge, and skills that characterize the professional social worker through scrutinizing real life problems, addressing real life needs and applying concepts learned in class to the real world context. Discussions will focus on leadership issues, concepts, and situations that are evident in small groups, organizations and communities.

Transforming Communities through  
Active Leadership and Engagement

# New CSU Learning Communities for Spring 2011

## Why Join a Learning Community?

- Interesting connections between courses across disciplines
- Scheduling that helps you with time management
- Strong support systems for successful academic achievement and social interactions
- Enthusiastic and engaged faculty
- Peer Mentor Coaches

# New CSU Learning Communities Spring 2011

## Evidence Based Learning and Bioscience

General Education Credits = 11

This Learning Community is appropriate for students who are considering nursing and other health careers. Participants will explore a systems approach to human anatomy and physiology through observation, experimentation and prediction of morphological structures that make up the human body. Research and information literacy skills are taught concurrently with statistical methodology applications which are also relevant to social and behavioral sciences, education, and business. Experienced and dedicated faculty conduct lively and interactive sessions.

### Spring 2011 Courses

BIO 268: Human Anatomy and Physiology II (3) *Natural Science*

BIO 269: Human Anatomy and Physiology II Laboratory (1) *Natural Science Lab*

ENG 102: College Writing II (3) *Writing*

MTH 147: Statistical Concepts with Applications (5) *Quantitative Literacy*

## Paraphernalia for Health Related Careers

General Education Credits = 11

Chemistry is referred to as the "Central Science." In this community, you will analyze organic and biological chemistry and how this is related to other health sciences. You will participate in learning activities that equip you with research methodology approaches for understanding biological bases of behavior, perception, motivation and emotion; learning and memory; development; intelligence; personality; mental disturbance; and social influence. You will work with faculty and affiliated student scientists who are well trained in the use of exclusive tools of chemical inquiry and commitment to scientific investigation.

### Spring 2011 Courses

CHM 252: College Chemistry II (3) *Natural Sciences*

CHM 257: College Chemistry Laboratory II (1) *Natural Science Lab*

ENG 102: College Writing II (3) *Writing*

PSY 101: Introduction to Psychology (4) *Social Science required for Nursing Majors*

PSY 101: Recitation (0) *Required for PSY 101*
