Introduction/Context

The College of Education & Human Services endeavors to provide comprehensive and engaging academic programs that will help students acquire the knowledge, skills, and dispositions needed to become teachers. Four teacher preparation programs leading to the B.S. Ed. are available to majors in early childhood education (grades PreK-3), middle childhood education (grades 4-9), special education (grades K-12), and physical education (grades PreK-12). Adolescent/young adult licensure programs (grades 7-12) are also available in language arts, mathematics, science, and social studies to undergraduates in CLASS and COS who minor education. Likewise, multi-age licensure programs (grades pre-K-12) in foreign language education, music, and the visual arts are available to undergraduates in CLASS who major in these cognate fields.

All programs for prospective teachers offered by the College of Education & Human Services are fully accredited by the National Council for the Accreditation of Teacher Education (NCATE) and approved by the Ohio Department of Education (ODE). In accordance with NCATE guidelines, these programs have been developed to meet the standards of applicable Specialized Professional Associations (SPAs) such as the National Association for the Education of Young Children, the Council for Exceptional Children, the National Council of Teachers of English, and the National Council of Teachers of Mathematics.

On-site training in the form of supervised practicum and student teaching experiences play a critical role in every program and are designed to complement students' on-campus experiences by providing them an opportunity to apply the knowledge and pedagogical skills they are acquiring to the planning and delivery of instruction in actual classroom settings. Minimally, one of these experiences must be completed in an urban setting. In multi-age licensure programs, a conscious effort is also made to ensure field experience with youngsters of varying abilities at different grade levels.

Oversight for all undergraduate teacher licensure programs is provided by the Teacher Education Council (TEC) in conjunction with the Undergraduate Affairs Council (UAC) and Teacher Education Advisory Council (TEAC). TEC is comprised of eight faculty members elected by the departments offering undergraduate and graduate teacher preparation programs and is chaired by the Associate Dean for Academic Programs. UAC is charged with reviewing any curriculum proposals set forth by TEC and/or individual departments which affect the College’s undergraduate teacher preparation programs and to make appropriate recommendations relative to their adoption. TEAC includes faculty and administrative representatives from COEHS, CLASS and COS as well as external constituencies that have an interest in the College’s teacher preparation programs. TEAC serves to (a) promote collaboration on program design, delivery and evaluation both within and beyond the University; (b) review and respond to new and revised curriculum, policies and procedures approved by COEHS curriculum committees; (c) review assessment and accreditation information; and (d) provide feedback about the quality of programs.

Goals

As a model for all of its undergraduate teacher licensure programs, the College of Education & Human Services is committed to the ongoing development of “The Teacher as a Responsive, Reflective Professional—A Partner in Learning.” As initially conceived in 1997, the four knowledge bases that continue to serve as a foundation for this model emphasize the importance of inquiry, collaboration, contextualism, and professionalism in effective practice.

As they related to the four knowledge bases and Praxis III domains for assessing field-based performance, the 12 specific goals that govern all teacher licensure programs follow:

1. Personal Philosophy. The CSU teacher education student articulates a personal philosophy of teaching and learning that is grounded in theory and practice [Knowledge Base: Professionalism; Praxis III Domain D]
2. **Social Foundations.** The CSU teacher education student possesses knowledge and understanding of the social, political, and economic factors that influence education and shape the worlds in which we live. [Knowledge Base: Contextualism; Praxis III Domain D]

3. **Knowledge of Subject Matter and Inquiry.** The CSU teacher education student understands content, disciplinary concepts, and tools of inquiry related to the development of an educated person. [Knowledge Base: Inquiry; Praxis III Domains A & C]

4. **Knowledge of Development and Learning.** The CSU teacher education student understands how individuals learn and develop, and that students enter the learning setting with prior experiences that give meaning to the construction of new knowledge. [Knowledge Base: Contextualism; Praxis III Domain A]

5. **Diversity.** The CSU teacher education student understands how individuals differ in their backgrounds and incorporates and accounts for such diversity in teaching and learning. [Knowledge Base: Contextualism; Praxis III Domains A & B]

6. **Learning Environment.** The CSU teacher education student uses an understanding of individual and group motivation to promote positive social interaction, active engagement in learning, and self-motivation. [Knowledge Bases: Contextualism, Partnerships; Praxis III Domain B]

7. **Communication.** The CSU teacher education student uses knowledge of effective verbal, nonverbal, and media communication techniques to foster inquiry, collaboration, and engagement in learning environments. [Knowledge Bases: Inquiry, Partnerships; Praxis III Domains B, C & D]

8. **Instructional Strategies.** The CSU teacher education student plans and implements a variety of developmentally appropriate instructional strategies to develop performance skills, critical thinking, and problem solving, as well as to foster social, emotional, creative and physical development. [Knowledge Bases: Contextualism, Inquiry; Praxis III Domains A & C]

9. **Assessment.** The CSU teacher education student understands, selects, and uses a range of assessment strategies to foster the physical, cognitive, social, and emotional development of learners and give accounts of students’ learning to the outside world. [Knowledge Bases: Inquiry, Contextualism; Praxis III Domains A, C & D]

10. **Technology.** The CSU teacher education student understands and uses up-to-date technology to enhance the learning environment across the full range of learner needs. [Knowledge Base: Contextualism; Praxis III Domain C]

11. **Professional Development.** The CSU teacher education student is a reflective practitioner who evaluates his/her interactions with others (e.g., learners, parents/guardians, colleagues, professionals in the community) and seeks opportunities to grow professionally. [Knowledge Bases: Inquiry, Professionalism, Partnerships; Praxis III Domain D]

12. **Collaboration and Professionalism.** The CSU teacher education student fosters relationships with colleagues, parents/guardians, community agencies, and colleges/universities to support students’ growth and well-being. [Knowledge Bases: Professionalism, Partnerships; Praxis III Domain D]

Program faculty developed these goals so as to be fully compliant with State Board of Education and SPA standards for teacher preparation. They were originally derived in 1997 by a task force comprised of faculty, administrators, staff, students, and school professionals. Deemed to still be relevant on the basis of a recent review by the College’s Teacher Education Council that was conducted during the 2006-07 academic year, the goals have not changed since the NCA Assessment Plan for the College’s B.S. Ed. and related teacher licensure programs was first formulated.

**Outcomes**

Specific program outcomes as they related to each of the aforementioned goals are tabled in the NCA Status Report #10 which accompanies this document. Deemed to still be relevant on the basis of a 2006-07 review conducted by the College’s Teacher Education Council, these outcomes as originally developed by program faculty have not changed since the NCA Assessment Plan for the College’s B.S. Ed. and related teacher licensure programs was first derived. Briefly, they require that:

- All students demonstrate required knowledge, skills, and dispositions as reflected by satisfactory course performance.
• At least 90% of all undergraduate and post-baccalaureate candidates for teacher licensure will achieve a passing score as defined by the Ohio Department of Education on the appropriate version of the Praxis II exam, *Principles of Teaching & Learning* (PLT).

• At least 90% of all candidates for teacher licensure will achieve a passing score as defined by the Ohio Department of Education on any required Praxis II content area specialty exams.

• By the conclusion of their program, at least 90% of all candidates for teacher licensure will minimally demonstrate proficiency on all 12 program goals through submission of an acceptable professional portfolio that is keyed to these goals.

• Taken as a whole, mean score ratings for all items on candidates’ final student teaching evaluations will equal or exceed 3.5 on a scale of 1 (unsatisfactory) to 4 (outstanding).

• As reported on an exit survey administered to students at the conclusion of their program, mean score ratings for all goal-related items will equal or exceed 2.00 on a scale of 0 (low) to 3 (high).

• At least 90% of program completers will achieve a passing score on each domain of the Praxis III assessment of teaching performance during their initial two years of teaching.

**Research**

For the purpose of the current report, seven measures were employed to assess student outcomes.

**Grade Point Averages (direct measure)**

Eligibility for the B.S. Ed. and/or teacher licensure minimally requires that all students have achieved an overall cumulative CSU grade point average of at least 2.50 and a 2.75 grade point average for all professional course work in education. As regards the latter, no grades of D or F are permitted in education courses. In addition, students must receive a B or better in any required practicum and a grade of S in student teaching. Students seeking Multi-age licensure in Physical Education, Music, Visual Arts, or Foreign Language Education; Middle Childhood licensure; or Adolescent/Young Adult licensure must also achieve and maintain a grade point average of at least 2.50 in each of their academic subject area concentrations or major.

**The Praxis II Principles of Learning & Teaching (PLT) Examination (direct measure)**

Designed and administered by ETS, the Praxis II PLT is aimed at assessing the beginning teacher’s knowledge and understanding of fundamental principles that govern teaching and learning as typically covered in courses on educational psychology, human growth and development, classroom management, instructional design and delivery, and evaluation and assessment. Four separate, but equivalent, versions of the PLT exist to differentiate among the pedagogical knowledge required at different grade levels as follows: Early Childhood (PreK-Grade 3), Grades K-6, Grades 5-9, and Grades 7-12. All candidates for initial teacher licensure in the State of Ohio are required to take one of these exams; passing scores for each measure are set by the Ohio Department of Education.

Each PLT exam includes four case histories that outline particular teaching situations. For each case history, examinees are required to respond to three short-answer essay questions. Collectively, these 12 items cover the prospective teacher’s knowledge of students as learners, instruction and assessment, communication techniques, and various issues related to teacher professionalism. In addition, all PLT exams also contain 24 multiple-choice items that similarly assess knowledge of student development, diversity and related issues, motivation, classroom climate, teaching strategies, instructional planning, assessment techniques, and professional concerns.

**Praxis II Specialty Exams (direct measure)**

Also designed and administered by ETS, the Praxis II Specialty Exams measure candidates’ knowledge of the subjects they will teach, as well as subject-specific pedagogical skills and knowledge. Required exams and passing
scores for each are set by the Ohio Department of Education. The content and format of these exams differs by subject area such that some exams are comprised entirely of multiple-choice items whereas others contain a combination of both multiple-choice and short-essay questions.

**Professional Portfolio (direct measure)**

At the conclusion of their program, students must demonstrate accomplishment of all 12 program goals through submission of a satisfactory professional portfolio which is keyed to these goals. Work on this portfolio is ongoing and begins in the first professional education course (EDB 200). Satisfactory progress is assessed at several defined checkpoints throughout the program and culminates with a final evaluation that is conducted near the conclusion of student teaching. At program completion, students must minimally demonstrate proficiency on all 12 goals. To that end, their professional portfolios typically contain one or two items for each program goal that have been purposely selected to best reflect achieved competence, individuality, and creativity as a professional teacher. Each artifact must be accompanied by a reflective cover sheet that serves to explain why it was selected and how it relates to the designated goal to which it is keyed. Artifacts are individually assessed by the instructors of those courses from which they are obtained using an agreed upon set of rubrics that was developed by the College’s Teacher Education Council. The entire professional portfolio is likewise subject to final assessment using these same rubrics.

Table 1 provides examples of the kinds of artifacts students usually include in their professional portfolios as they specifically relate to each goal or standard.

### Table 1. Examples of Artifacts for Each Program Outcome

<table>
<thead>
<tr>
<th>Program Standard</th>
<th>Examples of Artifacts</th>
</tr>
</thead>
</table>
| 1. Personal Philosophy | • personal philosophy paper  
• position paper on philosophical issue  
• letter from student, parent, instructor, school administrator containing assessments of those aspects of your performance that give evidence of your philosophy |
| 2. Social Foundations | • essay on a complex social issue  
• position paper on a complex social issue  
• research paper/project on a complex social issue |
| 3. Knowledge of Subject Matter and Inquiry | • resource reference in lesson plans  
• learning packet that demonstrate knowledge of content  
• lesson plan, web site (self-designed), or outline in which content is clearly explained  
• research conducted in preparation for instruction  
• research paper in content area  
• project done as part of content area coursework  
• article summary or critique  
• copy of evaluation that comments on and/or rates the knowledge of subject matter you demonstrate in your teaching |
| 4. Knowledge of Development and Learning | • case study  
• notes from observation of pupils  
• example of differentiated curriculum  
• adaptation of lesson or unit plan to account for individual differences  
• lesson plan including “developmentally appropriate” learning activities  
• diagnostic tool used to get to know pupils  
• audio or videotape with analysis  
• sample of checklist used to record development of pupils |
| 5. Diversity | • curriculum, unit plan, or lesson plan incorporating content, materials, activities designed to enhance pupils’ appreciation for any ethnic group, gender, religion, handicapping condition, etc.  
• curriculum, unit plan, or lesson plan incorporating content, materials, activities differentiated to account for diverse learners  
• essay or position paper on issue of diversity  
• audio or videotape with analysis  
• copy of IEP you helped to develop  
• journal reflection |
| 6. Learning Environment | • copy of classroom management plan  
|                        | • audio or videotape with analysis  
|                        | • lesson plan with evidence of planning for the management of time and materials  
|                        | • pictures of bulletin board, learning stations, classroom, etc.  
|                        | • written observation by supervisor  
|                        | • lesson or unit plan incorporating strategies to enhance cooperation and collaboration among pupils  
|                        | • record showing how pupil behavior was affected by implementation of management strategies  
| 7. Communication       | • copy of lesson or unit plan showing effective use of media  
|                        | • copy of media developed for use in instruction  
|                        | • picture of bulletin board  
|                        | • assessment of communication skills by supervisor, cooperating teacher, peers, etc.  
|                        | • audio or videotape with analysis  
|                        | • copy of lesson plan with list of divergent questions asked of pupils  
|                        | • journal reflection on use of effective communication  
| 8. Instructional Strategies | • copy of lesson or unit plan  
|                          | • audio or videotape with analyses  
|                          | • sample of pupil work generated as part of the implementation of an instructional strategy  
|                          | • journal reflection  
|                          | • assessment of teaching by supervisor, cooperating teacher, peers, etc.  
|                          | • copy (or picture) of materials developed for use in instructional strategies  
| 9. Assessment          | • copy of test developed to measure pupil status  
|                        | • description and/or videotape of assessment procedure with analysis  
|                        | • chart showing pre and post test results  
|                        | • sample of pupil test with comments  
|                        | • sample of pupil project/paper/essay with comments  
|                        | • copy of communication to pupil or parents with results of assessment  
|                        | • description of system used to record pupil assessment results and pupil progress (with sample materials)  
| 10. Technology         | • copy of lesson or unit plan showing use of technology  
|                        | • sample of media produced for use in instruction  
|                        | • copy of PowerPoint or similar presentation  
|                        | • audio or videotape with analysis  
|                        | • assessment of use of technology by supervisor, cooperating teacher, peers, etc.  
|                        | • journal reflection  
|                        | • sample of media/technology produced by pupils  
| 11. Professional Development | • journal reflection  
|                             | • copy of lesson or unit plan with reflective analysis  
|                             | • evidence of attendance at workshop, professional conference  
|                             | • evidence of membership in professional association  
|                             | • list of personal goals with analysis of achievement  
|                             | • evidence of presentation made at workshop or conference  
|                             | • annotated list of books and journals read  
|                             | • copy of article written for local, state, national journal  
|                             | • report of action research conducted in a field setting  
|                             | • report of how information and/or skills gained at workshop/conference or through reading was applied in your teaching  
| 12. Collaboration and Professionalism | • evidence of participation in extra-curricular activities  
|                                      | • copy of communication with parents, colleagues, community members  
|                                      | • documentation of meetings with parents, colleagues, community members  
|                                      | • sample of materials prepared for a meeting, class, etc., in which a leadership role was assumed  
|                                      | • thank you, certificate, testimonial to attest to work done in collaboration with others  

By way of illustration, the rubric used to evaluate Goal/Standard 1 artifacts is contained in Table 2. Complete instructions for the portfolio system, including all 12 rubrics used in assessment, are contained on the College’s web site and may be found at the following address:  http://www.csuohio.edu/coehs/students/portfolios/index.htm

**Student Teaching Evaluation Forms (direct measure)**

Based on repeated observations and pre/post observation conferences held throughout the term, the Student Teaching Evaluation Form provides a summative account of the licensure candidate’s mid-term and final performance in the field. Seven- and fifteen-week Student Teaching Evaluation Forms are completed by the intern or student teacher’s University supervisor with feedback from the mentor or cooperating teacher. Results of these evaluations ultimately form the basis of the student’s final grade for student teaching.

The Student Teaching Evaluation Form focuses on sixty-seven specific criteria that cover all aspects of the teaching experience. Students are evaluated on each criterion on a scale of 1 (unsatisfactory) to 4 (outstanding); a composite rating based on the same scale is also provided.

The sixty-seven items that comprise the Student Teaching Evaluation Form may more broadly be grouped in four domains which parallel those employed on the Praxis III which is used to evaluate new teachers. The relation of these domains to program goals has been earlier described; definitions for each domain follow:

NCA Progress Report #10
B.S. Ed. – Teacher Licensure All Programs
Domain A: Organizing Content Knowledge for Student Learning. Knowledge of the content to be taught underlies all aspects of good instruction. Domain A focuses on how teachers use their understanding of students and subject matter to decide on learning goals; to design or select appropriate activities and instructional materials; to sequence instruction in ways that will help students to meet short- and long-term curricular goals; and to design or select informative evaluation strategies. All of these processes, beginning with the learning goals, must be aligned with each other, and because of the diverse needs represented in any class, each of the processes mentioned must be carried out in ways that take into account the variety of knowledge and experiences that students bring to class. Therefore, knowledge of relevant information about the students themselves is an integral part of this domain.

Domain A criteria for observing and evaluating student teachers focus on the degree to which the teacher education candidate:

- Demonstrates familiarity with relevant aspects of students' background knowledge and experiences.
- Articulates clear learning goals for lessons that are appropriate to the students.
- Displays an understanding of the connections between content that was learned previously, current content, and content that remains to be learned in the future.
- Creates and/or selects teaching methods, learning activities, and instructional materials or other resources that are appropriate to the students and that are aligned with the lesson goals.
- Creates and/or selects evaluation strategies that are appropriate for the students and that are aligned with lesson goals.

Domain B: Creating an Environment for Student Learning. Domain B relates to the social and emotional components of learning as prerequisites to academic achievement. Thus, this domain focuses on the human interactions in the classroom, on the connections between teachers and students, and among students. Domain B addresses issues of fairness and rapport, of helping students to believe that they can learn and can meet challenges, and of establishing and maintaining constructive standards for behavior in the classroom. It also includes the learning "environment" in the most literal sense--the physical setting in which teaching and learning take place.

Domain B criteria for observing and evaluating student teachers focus on the degree to which the teacher education candidate:

- Creates a classroom climate that promotes fairness.
- Establishes and maintains rapport with students.
- Effectively communicates challenging learning expectations to each student.
- Establishes and maintains consistent standards of classroom behavior.
- Makes the physical environment as safe and conducive to learning as possible.

Domain C: Teaching for Student Learning. This domain focuses on the act of teaching and its overall goal: helping students to connect with the content. As used here, "content" refers to the subject matter of a discipline and may include knowledge, skills, perceptions, and values regarding various areas of development: cognitive, social, artistic, physical, and so on. Teachers direct students in the process of establishing individual connections with the content, thereby devising a good "fit" for the content within the framework of the students' knowledge, interests, abilities, cultural backgrounds, and personal backgrounds. At the same time, teachers should help students to move beyond the limits of their current knowledge or understanding. Teachers monitor learning, making certain that students assimilate information accurately and that they understand and can apply what they have learned. Teachers must also be sure that students understand what is expected of them procedurally during the lesson and that class time is used to good purpose.

Domain C criteria for observing and evaluating student teachers focus on the degree to which the teacher education candidate:

- Makes learning goals and instructional procedures clear to students.
- Makes content comprehensible to students.
- Encourages students to extend their thinking.

NCA Progress Report #10
B.S. Ed. – Teacher Licensure All Programs
• Monitors students' understanding of content through a variety of means, providing feedback to students to assist learning, and adjusting learning activities as the situation demands.
• Uses instructional time effectively.
• Uses technology effectively.

**Domain D: Teacher Professionalism.** Teachers must be able to evaluate their own instructional effectiveness in order to plan specific future lessons for particular classes and to improve their teaching over time. They should be able to discuss the degree to which different aspects of a lesson were successful in terms of instructional approaches, student responses, and learning outcomes. Teachers should be able to explain how they will proceed to work toward learning for all students. The professional responsibilities of all teachers, including beginning teachers, also include sharing appropriate information with other professionals and with families in ways that support the learning of diverse student populations.

Domain D criteria for observing and evaluating student teachers focus on the degree to which the teacher education candidate:

• Reflects on the extent to which the learning goals were met.
• Demonstrates a sense of efficacy.
• Builds professional relationships with colleagues to share teaching insights and to coordinate learning activities for students.
• Effectively communicates with parents or guardians about student learning.

**Praxis III Results (direct measure)**

In order to transition from a two-year provisional license to a five-year professional license, Ohio performance-based licensure standards (Rule 3301-24-02) require that all newly hired teachers must successfully complete an entry-year program and pass the Praxis III which measures actual classroom performance in the four domains noted above. Praxis III results for students who completed licensure programs at CSU are annually supplied to the College by the Ohio Department of Education.

**Exit Surveys (indirect measure)**

At the conclusion of the program, students are asked to complete an exit survey. Thirteen items on this questionnaire specifically ask students to reflect on the degree to which their overall program helped them achieve designated goals. With the exception of Goal #11 (Professional Development), which is measured by two items, one question is provided for each standard or goal. The rating scale for each item ranges from 0 (low) to 3 (high).

**Other Indirect Measures**

In preparation for an upcoming NCATE accreditation visit in fall of 2009, plans are underway to conduct follow-up alumni and employer surveys in 2007-2008. Existing survey instruments are in the process of being revised and mailing labels have been secured from the Office of Advancement Services.

**Findings**

As tabled findings contained in the accompanying Status Report #10 reveal, established benchmarks for all goals and outcomes have been met. For convenience, a brief summary of results for each outcome follows:

• As reflected by grade point averages required for graduation and/or licensure, all students demonstrated required knowledge, skills, and dispositions through satisfactory course performance.

• 91% of all undergraduate and post-baccalaureate candidates for teacher licensure achieved passing scores as defined by the Ohio Department of Education on Praxis II PLT and 94% received passing scores on specialty exams.
• By the conclusion of their program, at least 98% of all candidates for teacher licensure minimally demonstrated proficiency on all 12 program goals through submission of an acceptable professional portfolio keyed to those goals.

• Collectively, mean score ratings for all items on candidates’ final student teaching evaluations equaled or exceeded 3.64 on a scale of 1 (unsatisfactory) to 4 (outstanding).

• As reported on an exit survey administered to students at the conclusion of their program, mean score ratings for all goal-related items equaled or exceeded 2.31 on a scale of 0 (low) to 3 (high).

• Finally, as confirmed by the latest report available from the Ohio Department of Education 99.6 percent of all CSU program completers who secured teaching positions in Ohio passed the Praxis III examination during their initial two years of employment and consequently qualified for a five-year professional license.

Review

Praxis II and Praxis III results are annually made available by public report. These and other assessment findings are likewise reviewed by program faculty and the Teacher Education Council each year.

Actions

Response to 2005 and 2006 Assessment Report Reviews

As indicated in last year’s report, the Teacher Education Council (TEC) undertook a more comprehensive review of the existing assessment plan against new standards for the teaching profession that were adopted in October of 2005 by the State Board of Education for Ohio. On the basis of that review, which was conducted in 2006-07, TEC has determined that existing goals and outcomes remain relevant and do not require revision at this point in time.

In response to the only limitation formally noted in the 2006 Assessment Report Review, every effort was made to bolster student response rate to the exit questionnaire. By further encouraging University supervisors to ensure that the questionnaire was administered to all students at the conclusion of student teaching, the response rate for 2007 is more than double that obtained in 2006.

Other Actions

Consideration is being given a new format for reporting student outcomes back to faculty. The format provides a concise account of outcomes that is program specific and should further promote faculty discussion of identified strengths and weaknesses. The new format was designed to meet SPA reporting requirements for NCATE accreditation. A sample of the new report form is included in Appendix A at the conclusion of this narrative.

Remedial actions continue to be taken in isolated cases to correct for individual deficiencies in student performance. For example, the remedial plan that was put in place in January 2005 for all students who failed to demonstrate satisfactory progress in the development of a professional portfolio remains in effect. More specifically, at the conclusion of practicum, students who fail to achieve an emergent level of competency on all 12 program outcomes and proficiency in at least 8 are required to meet with a Remediation Review Board comprised of program faculty to determine if additional or different documentation for one or more program outcomes would help them attain established criteria or if remedial work is required to reach acceptable levels of performance. In instances where remedial work is deemed essential, a further determination is made regarding immediate eligibility for student teaching placement. In instances where marked deficiencies are present, students are informed that they will not be permitted to student teach until an acceptable portfolio is submitted for reassessment. Where modest improvements are needed, permission is granted to student teach and supervisory personnel informed of remedial work requirements to ensure proficiency in all outcomes by the time of program completion.

Praxis II refresher courses to assist students in preparing for the PLT continue to be offered by the Department of Curriculum and Foundations. Unfortunately, no headway has been made in raising the passage rate on the PLT for grades K-6 or grades 5-9. This matter will be referred to the Teacher Education Council for discussion in 2007-08.
Scores on specialty tests for integrated mathematics, integrated social studies and the mild/moderate special education program have all increased such that more than 90 percent of all students who took required tests in these areas passed them. Unfortunately, scores for middle childhood language arts and science as well as those for physical education dropped below the 90 percent target—declines that will be reported to program faculty for review in the upcoming academic year.

Finally, the College is in the process of implementing a new outcomes assessment measure for initial licensure programs. This measure consists of a work sample artifact to be submitted at the conclusion of student teaching to demonstrate the degree to which CSU teacher candidates are having a positive impact on student achievement in grades PreK-12.

</tbody>
</table>

While the aggregate passage rate on all PLT exams exceeded the specified criterion, the overall percentage of student passage declined from 94% in 2006 to 91% in 2007. Disaggregated results indicate that the overall decline was due to passage rate drops on all PLT exams except the one for Early Childhood which enjoyed a slight increase from 95% in 2006 to 98% in 2007. The decrease in passing scores on the K-6, 5-9, and 7-12 PLT exams will be referred to the Teacher Education Council for review.

- Possesses knowledge and understanding of factors that influence education. (Goal 2)
- Understands how individuals learn and develop, including role of prior experience in construction of new knowledge. (Goal 4)
- Understands how individuals differ and accounts for diversity in teaching and learning. (Goal 5)

### REVIEW, ACTIONS & IMPROVEMENTS

Understands content, disciplinary concepts, and tools of inquiry. (Goal 3)

The aggregate passage rate on specialty exams remained stable at 94% and exceeded the specified criterion. Disaggregated results suggest the need for 2007-08 review by middle childhood program faculty in science and language arts and by physical education faculty albeit the 82% passage rate on the physical education specialty exam is likely a function of the small number of students who took this test.

---

**Rule of 10**: Statistical conclusions cannot be drawn when less than 10 individuals have taken a test. Consequently, no pass rate percentage is calculated when fewer than 10 teacher candidates take the Praxis II test.
ASSESSMENT MEASURE: PRAXIS III Exam
TARGETED OUTCOME: At least 90% of program completers will achieve a passing score on each Domain of the Praxis III exam during their initial two years of teaching.

<table>

As reported by ODE, 99.6% of all program completers who obtained teaching positions in Ohio passed the Praxis III exam during their initial 2 years of teaching. 2007 findings are comparable to those obtained in both 2006 and 2005. No action required.

*Minimum Criteria Scores for Domains B and C: The Entry Year Teacher may receive no more than one score below 2.0 on any criterion item in Domains B and C. For example, if the Entry Year Teacher scores a 1.5 on an item in Domain B and a 1.0 on an item in Domain C, s/he will not pass the Praxis III even if his/her overall scores for each of these domains meet or exceed the required 10 points needed for passing.
