

Quality Control Laboratory Manager

Location: Cleveland, Ohio

A Chemical Manufacturing Facility in the Cleveland area is looking to fill a newly created position at their location for a Quality Control Laboratory Manager. The opportunity for a Chemist is a new position created to emphasize their commitment to Quality. It affords the right candidate with the opportunity to develop the QC lab / processes into their own vision. At the same time it provides an excellent opportunity for professional and functional advancement with an excellent organization.

An ideal candidate would have a chemistry or related degree, five plus years of Quality related experience, understands policies of Quality, Safety & Environmental Management, along with a broad understanding of a chemical manufacturing facility, including laboratory & some chemical processes.
