

accurate affordable assays

Analiza, Inc. is a contract research organization providing cost-effective, high throughput ADME testing services to the drug discovery industry. Our clients include large and small biotech and pharmaceutical companies. We are located in St. Clair-Superior neighborhood of Cleveland, OH in close proximity to downtown, Case Western Reserve University and Cleveland State University.

We currently have an immediate opening for a Research Technician/Chemist in our ADME services group.

Job Description: The research technician will conduct all aspects of logD, solubility, blood brain barrier permeability, and other ADME assays following established methods. The technician will also be required to maintain and troubleshoot laboratory equipment and facilities. The technician will assist in the development and commercialization of new assays.

Job Requirements:

- BA/BS in Chemistry or related discipline or AS with laboratory experience
- Experience with HPLC, lab automation, and wet chemistry strongly desired
- Must be a self starter with high motivation level and eagerness to learn
- Detail oriented
- Good aptitude for troubleshooting laboratory equipment
- Good organization skills
- Excellent computer skills with proven proficiency in Microsoft Office products including Word and Excel.

For Consideration please submit resume to:
