

The position is for Quality Control Laboratory Manager with a chemical manufacturing facility in the Cleveland area. A key requirement is a strong chemistry background. Referral of qualified candidates would be most appreciated.

The opportunity is a new position created to emphasize their commitment to Quality. It affords the right candidate with the opportunity to develop the QC lab / processes into their own vision. At the same time it provides an excellent opportunity for professional and functional advancement with an excellent organization.

An ideal candidate would have a Chemistry or related degree with a strong understanding of chemistry, five plus years of Quality related experience, understands policies of Quality, Safety & Environmental Management, along with a broad understanding of a chemical manufacturing facility, including laboratory & some chemical processes.
