Filtering for Majors and Minors

Log into Starfish and go to the “Students” page and the “My Students” tab:

On the left hand side, click “Add Filters” (hint: if it says “Edit Filters,” you may want to clear them first), a pop-up window will open:

Click on the bottom option, “Attributes,” and click “Add Attribute:”
The following configuration will yield all of the Women’s Studies majors who are currently enrolled. Changing the attribute to “Minors” and using the entry will display the students with that minor:

Click “Submit” and all of your students matching these attributes will display.

Note: In this example, you must perform two searches, one for the majors and one for the minors (no one would major and minor in Women’s Studies). You can, however, search double majors in this way, History majors with a minor in Education, etc.

The wildcard in the form of an asterisk * or percent sign % must be used with the majors and minors in order to pull all double majors and should be configured like this: *Chemistry* (note that had you entered *Chem*, your list would include Chemical Engineering majors).

Here is a complete list of the Majors (include abbreviations & typos):
Accounting
Anthropology
Art Education
Art History
Biology
Biology - Integrated Science
Biology Pre-Podiatry
Biology-Medical Technology
Black Studies
