Do you text more than you email?

If you do, you can configure your Starfish emails to come to your phone as a text instead of an email! Here’s how:

Step 1 – Log into Starfish through CampusNet or Blackboard and click on your name in the top right hand corner of the page:

Step 2 – In the box title “Alternate Email,” type your 10-digit number followed by your carrier’s text address:

Step 3 – Indicate if you would like messages to go to this alternate email or both by clicking the appropriate radio button.

Not sure of your carrier’s address? Find it here:
- AT&T: @txt.att.net
- Verizon: @vtext.com
- T-Mobile: @tmomail.net
- Sprint: @messaging.sprintpcs.com
- Virgin Mobile: @vmobl.com
- US Cellular: @email.uscc.net
- Nextel: @messaging.nextel.com
- Boost: @myboostmobile.com
- Alltel: @message.alltel.com

Step 4 – Click “Submit.” That’s it – it’s that simple!
