	Handle someone else's calls if configured as a delegate	Yes	Yes	Yes	No	No	Yes
	Join a Lync/Skype Meeting	Yes	Yes	Yes	Yes	No	Yes

(1) For detailed information about Lync support in mobile clients, see Microsoft Lync 2013 for Mobile Clients.

(2) Lync mobile clients don't update a user's presence based on the user's free/busy calendar information:

- If a mobile client user is also signed in to the Lync desktop client, the desktop client updates the user's presence based on the user's free/busy calendar information.
- If the user is signed in to only a mobile client, the user's presence doesn't update based on free/busy calendar information.

(3) Lync runs in the background on the device, so push notifications aren't required.
