

Allsteel®

Terrace DNA™

Welcome to Terrace DNA.

What makes a workspace inspiring? The truth is it's different for every office and for every worker. That's why Terrace DNA offers so many flexible solutions along with refined design details. So you can keep it basic or dress it up with details like rich veneer and frameless glass, tile segmentation, and footed panels. However you put it together, you'll create a functional, welcoming space that looks every bit as good as it works.

Panel fabric: **Refuge Frost**  
Cleargrain® veneer: **Light Cherry**  
Laminate (edge): **Frosty White (White)**  
Paint: **Brownstone**  
Seating upholstery: **Edelman® All Grain Cherry**  
Frame finish: **Polished Aluminum**  
Mesh carrier (mesh): **Graphite (Mist)**

## **Better workspaces. Bigger ideas.**

Ideas often come out of collaboration. Other times from focused research. And sometimes they appear out of the blue.

Terrace DNA makes it easy to design environments that fit all the different ways people work, from manager stations for focused activities to teaming areas for group collaboration. Lower the panels, add frameless glass screens, and tuck in mobile pedestals to create open, naturally lit workspaces with an aesthetic that inspires rather than distracts. So nothing gets in the way of the next big idea.

Allsteel is the first contract office furniture manufacturer to have all products certified either SCS Indoor Advantage™ or Indoor Advantage Gold for better air quality in and out of the workplace.

Landscape™ surface: **Frosted Glass**  
 Panel fabric: **Appoint Dune**  
 Laminate (edge): **Frosty White (White), Savoy Cherry**  
 Paint: **Brilliant White, Brownstone, Silver**  
 Seating upholstery: **Maharam® Medium Honey, Maharam Medium Laser**  
 Frame finish: **Burnished Cherry and Silver, Charblack, Polished Aluminum**

Power, data, and charging stations are located conveniently at worksurface height, making it quick and easy for individuals or teams to plug in, connect, and get busy.

Create open, airy solutions that are functional and efficient by blending other products with Terrace DNA. Adding desk screens, Merge® tables, and side-access towers helps keep teams organized and productive.

## Workspaces as active as the workday.

Today's workers are multi-tasking more than ever, constantly moving from focused work to team interaction. So shouldn't workspaces be just as adaptable? They can be by adding sit-to-stand worksurfaces to give people the freedom to change postures whenever they please.

Then put storage within arm's length by using Reach® to divide work areas with lots of active, accessible files, shelves, doors, and drawers built into both sides. Best of all? Reach storage and Terrace DNA panels align seamlessly for a perfect aesthetic down to the last detail.

Allsteel products are level™ 2 certified to the ANSI-BIFMA e3 Furniture Sustainability Standard, the second-highest ranking achievable.

Landscape surface: **Clear Glass, Infinite Spectrum™** simulating **PANTONE® 19-1557 TPX Chili Pepper** from the **PANTONE** for architecture and interiors color system, **Marker Board, Perforated Steel**  
 Panel fabric: **Tasanee Frost**  
 Natural veneer: **Natural Maple**  
 Paint: **Brilliant White**  
 Seating upholstery: **Burst Cardinal, Trisect Onyx**  
 Frame finish: **Black, Silver**

Terrace DNA offers ergonomic solutions for a variety of postures and tasks. A standing-height work area creates a collaborative space that's comfortable for sitting or standing. Or a sit-to-stand mechanism easily adjusts the worksurface up and down to accommodate changing postures throughout the day.

It's easy to mix and match materials to design environments that are interesting as well as functional. The choices are endless, from glass, steel, and translucent materials to marker boards.

## Functionality leads to focus.

Traditional, compact offices need to work even harder to keep people comfortable, organized, and productive. And Terrace DNA does basic beautifully.

Select 57½" high panels to create needed separation for individual, heads-down work. Then optimize each workstation with details like standing-height and layered worksurfaces, and Extensions™ work tools to provide comfortable, efficient environments. With so many options, it's no wonder Terrace DNA offers the best price-to-performance ratio for planning today's workspaces.

Panel fabric: **Refuge Mineral**  
Laminate (edge): **Frosty White (White)**  
Paint: **Brilliant White**  
Seating upholstery: **Maharam Consider Bamboo**  
Frame finish: **Charblack**

A typical Terrace DNA workstation is made of 29% pre-consumer and 16% post-consumer recycled content and is 96% recyclable.

A variety of Extensions work tools keeps worksurfaces clear and the day organized, so people can focus on the task at hand.

With Terrace DNA, basic can still be inspiring, thanks to flexible, but traditional design options perfect for focused, individual work.

## Something beautiful to build on.

Any way it's configured, Terrace DNA creates functional, hardworking spaces. And adding thoughtfully designed details can lead to something truly special.

From the bottom up, you have the flexibility to create one-of-a-kind spaces that make a strong visual statement while meeting day-to-day needs. From footed panels to frameless glass. Multi-purpose storage to worksurface-height power and data. The choices are endless. And so are the opportunities for those who work in the space.

Terrace DNA offers sturdy panel frames that stand up to years of use and numerous reconfigurations, which benefits the environment by saving raw materials and energy required to make new products.

Panel fabric: **Appoint Nimbus, Refuge Mineral**  
 Laminate (edge): **Frosty White (White)**  
 Paint: **Platinum Metallic**  
 Seating upholstery: **HBF® Clay Wall Wildberries, Maharam Milestone Rush**  
 Frame finish: **Silver**  
 Mesh carrier (mesh): **Titanium (Lustre)**

Refined details like footed panels, segmented tiles, spanning panel top trim, and frameless glass allow aesthetic differentiation across your floorplan.

## Terrace DNA. Make it yours.

The most beautiful thing about Terrace DNA is its ability to go from traditional to contemporary. From monolithic to segmented. It can support heads-down concentration or encourage open interaction. Use higher panels to create more privacy, or choose lower panels for a lighter scale. It's all in the details. Load it up with storage, or slim it down for space efficiency. It's up to you. Make it yours.

### Clockwise from top left:

Frameless glass creates open, inviting worksettings that take advantage of natural light while defining individual work areas.

Layered worksurfaces offer design flexibility while supporting worker productivity.

Footed panels add to the visual aesthetic while improving air movement within work environments.

Open and closed storage options make it easy to personalize individual storage. The open leg is an alternative to the traditional end-panel design, providing yet another flexible design option.
