Data Tethering Services

Data tethering is a technique in which a cell phone is used as a wireless modem to provide Internet access to a computer or other Wi-Fi-enabled device, like a tablet or laptop.

This plan would replace the unlimited domestic plan that would be on your cell phone. The data tethering plan can be changed at any time and the domestic plan placed back on.

The plans would need to be added as close to the beginning of the billing cycle (the 10th of the month) to make sure that you have the full amount or as close to the amount to eliminate prorated charges and usage.

The plan can be added and removed at any time but must remain on the phone for at least 30 days after being added. To add one of these features, submit an email to Telecommunications at telcom@csuohio.edu

Plans that can be added to an existing phone:
Tethering – Just Data – On IPhone

- Price: $48.75 per month
- Includes 5 GB per month
- Additional Data $10/GB
- In place of current data Plan

Tethering – W/Unlimited Messaging – On IPhone

- Price: 60.00 a month
- 4 GB
- Additional Data $10/GB
- In place of current data Plan
