

Department of Mathematics

CREDIT BY EXAMINATION

A student may acquire credit by examination for any math course numbered 147 or above, **except** MTH 127, 128, 129, 167, 168, 301, and 495. The following rules apply:

1. Credit by examination is available only to matriculated, degree-seeking students.
2. The student must have passed - at CSU - all prerequisite courses, or must be placed in the course by the CSU Math Placement Exam.
3. The student cannot have attempted the course at CSU.
4. The student cannot have previously attempted credit by examination for the course.
5. A student cannot use credit by examination for a course if he/she already has credit for a more advanced course. [Note: A higher course number does not necessarily denote a more advanced course.]
6. The Mathematics Department will provide the student with a current syllabus for the course on which the examination is based.
7. The student must pay a \$20 examination fee at the Cashier's Office before he/she takes the examination.
8. On a pre-arranged date (about two weeks after payment), the student will take the examination at the Mathematics Testing Center, MC 434. The student will have two hours to complete the test. The passing grade is 85% or above.
9. Credit granted for passing the examination will be entered on the student's permanent record as hours earned. A grade is not assigned.
10. If the student fails the examination, no entry will be made on his/her permanent record.

Contact Prof. Chung Yi Suen at 523-7163 for any further information.
