PRESENTS

DAN R. CLAES

UNIVERSITY OF NEBRASKA LINCOLN

PRESENTING

Comic Book Physics 101

Professor Dan Claes will explore physics topics inspired by comic book characters, their superpowers and significant events in their history. He'll look at the limits of Superman's powers and figure out what can be deduced about his home planet, Krypton. He will discuss the fantastic cosmic origins of the Fantastic Four, the scaling limits of giant-sized heroes and monsters, and Claes talk about the homemade particle accelerator Tony Stark uses in "Iron Man 2" to produce element 118.
