How to get started on “Research”

Nigamanth Sridhar
What is Research?

• The pursuit of an “idea” that you think is important

• Research is the process of taking this idea and demonstrating to the community that it is important

• How?
  – Projects, papers, patents, etc.
So how do I get started?

- Read, read, read, read, read, read...
- And then read some more!
- Never stop reading
  - That’s where ideas come from
How do I find stuff to read?

- IEEE Xplore
- ACM Digital Library
- Google Scholar
- OhioLINK Olinks E-Journals

- Most important: Go to the Library
What should I read?

- See what topics are actively worked on by faculty here
- Talk to the faculty about research
- Read their papers
- Read past MS/D.Eng. Theses
- Talk to fellow graduate students involved in research
Come here Every Day

- Whether you have a class or not
- Spend at least a few hours in the department every day
- You don’t have to have a research assistantship in order to be interested in learning
Don’t forget to Have Fun!

- Most important of all: Enjoy grad school
- Make friends; some of these people will be worth staying in touch with for a long time to come
- Make friends with faculty: we want to know you better
