FINISH STANDARDS

Finish Standards have been developed by the Office of the University Architect to help provide a more cohesive look to the campus as a whole, as well as allowing for more efficient Zone Maintenance and faster project delivery. Several deciding factors went into these selections, including cost, maintenance, and availability, as well as environmental factors such as recycled content and indoor air quality. All requests for new finishes are to go through the FAST Service Request process via the Facilities Management website at https://www.csuohio.edu/facilities-management/facilities-management-0

These standards shall be used for all FAST Service Requests.

OUA projects may deviate from (but coordinate with) these standards
with written approval from the OUA Interior Designer and Facilities Director.

Digital/print copies of Finish Standards DO NOT match actual samples.
Office of the University Architect and Facilities Management have sample binders for use on FAST Requests.

PAINT STANDARDS

Finish Standards are based upon the ability of spaces to be "maintainable and transferrable". Standardized colors provide a more cohesive look to the campus as a whole, as well as allowing for more efficient Zone Maintenance. Several deciding factors went into these selections, including what office colors are already primarily used on campus (Dover White, Antique White, Bone White), utilizing the "Official University Color Palette" but toning the colors down to be suitable for wall-sized applications, and specifying a paint product that has zero VOCs for better indoor air quality.

GENERAL PAINT COLORS:

SW 7006	Extra White
SW 6385	Dover White
SW 6119	Antique White
SW 6112	Biscuit (aka Bone White)
SW 6365	Cachet Cream
SW 6036	Angora
SW 7064	Passive

ACCENT WALL COLORS:

SW 7072	Online
SW 7074	Software
SW 7075	Web Gray
SW 6802	Jacaranda
SW 6801	Regale Blue
SW 6773	Rapture Blue
CUSTOM	University Green
SW 6725	Pickle
SW 6717	Lime Rickey
SW 6703	Frolic
SW 6675	Afternoon
SW 6655	Adventure Orange
SW 6115	Totally Tan
SW 6106	Kilim Beige
SW 7690	Townhall Tan

LARGE PROJECTS and/or PUBLIC SPACES:
Must be approved by the Office of the University Architect.

SPECIFICATIONS:
Paint to be Sherwin Williams zero VOC Harmony.
Offices/Suites/Classrooms to be eg-shel finish.
Doors/Frames and Public Corridors to be semi-gloss finish.

BREAKTHROUGH INNOVATION.

EXCELLENT PERFORMANCE.

EXCLUSIVE FORMULA.

Harmony Paint — long known for its premium performance in a zero VOC formula — now contains Formaldehyde Reducing Technology, which helps promote better indoor air quality by reducing airborne concentrations of formaldehyde and other aldehydes. This unique technology actually helps reduce the levels of volatile organic compounds (VOCs) from potential sources like insulation, carpet, cabinets, fabrics and other building materials.

In addition, Harmony contains Odor Eliminating Technology, which reduces ambient odors of organic origin, like pet, cooking and smoke odors — making it ideal for multi-family, healthcare, institutional, commercial and residential projects. This zero VOC formula meets the most stringent VOC regulations. Harmony contains anti-microbial agents which minimize deterioration of the paint film caused by mold and mildew and extend the useful life of the paint. Harmony Paint provides great coverage, a finish that lasts, reduces interior odors and helps promote better indoor air quality.

HARMONY KEY BENEFITS

- Formaldehyde Reducing Technology helps improve indoor air quality by reducing VOCs from possible sources like insulation, carpet, cabinets and fabrics.*

- Odor Eliminating Technology helps reduce common indoor odors so rooms stay fresher, longer.*

- Anti-microbial agents inhibit the growth of mold and mildew on the paint surface and inhibit the growth of bacterial odors.

- Zero VOC formula tinted with ColorCast Ecotoner® Colorants that do not add VOCs when tinted.

- Great hide and a durable finish that withstands frequent washings.

- Available in flat, eg-shel and semi-gloss.

*The length of time Harmony actively reduces odors and formaldehyde depends on the concentration, the frequency of exposure and the amount of painted surface area.

ALSO AVAILABLE:

HARMONY® INTERIOR LATEX WALL PRIMER

- Primes, seals and hides.
- Prepares the surface to provide good topcoat performance.
- Zero VOCs.

RUBBER FLOORING STANDARDS

Finish Standards are based upon the ability of spaces to be "maintainable and transferrable". Standardized colors provide a more cohesive look to the campus as a whole, as well as allowing for more efficient Zone Maintenance. Several deciding factors went into these selections, including the ability to hide wear/mars (dark colors), recycled content, and the ability to be recycled/reprocessed upon removal.

CARPET STANDARDS

Finish Standards are based upon the ability of spaces to be "maintainable and transferrable". Standardized products provide a more cohesive look to the campus as a whole, as well as allowing for more efficient Zone Maintenance. Several deciding factors went into these selections, including cost (under $25 per sq. yd. on state contract), maintenance (Antron 6/6 nylon, solution dyed), availability (perceived lifespan of pattern), and recycled content (as noted below).

PATTERN #1:   BITRATE / DARK GREEN 106299
