Applying Additional Filters When Searching for Students

To assist you in supporting your students, Starfish allows for precise filtering of student lists based on several different characteristics and attributes.

Use the instructions below to learn how to apply filters. The guide on the following pages will help you use our Attributes filter, that allows you to filter for students based on various data points.

1. Log into Starfish using the "Starfish" link in your Advisor or Instructor tab in CampusNet.

2. Click on the menu options button in the top-left corner of the screen. Select 'Students'. Click on the "My Students" tab. Select your connection to the students whom you wish to view (by role or course). You can also begin with "All My Students" which, for many, will display all students.

3. To filter your students, select "Edit Filters". For best filtering results, clear all filters by clicking on the "X" next to "Edit Filters". Now that you've cleared your filters, you can now click "Add Filters:"
