

## Configuring Mac OS for CSUwireless:

1. Click on the **WIFI icon** in the **menu bar**, make sure your WIFI is on, and choose the **CSUwireless** network.

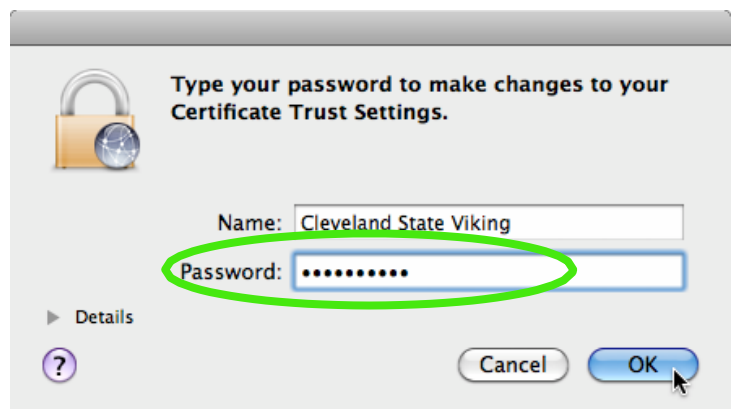

2. When the authentication dialog box appears enter your **CSU ID** in the **Username** field and your password in the **Password** field. Leave the **Mode** set to **Automatic**. Then click **Join**.

3. When the **Verify Certificate** box appears you may click on **Show Certificate** and verify that the certificate presented shows server **ise-psn1.csuohio.edu** or **ise-psn2.csuohio.edu**. Click on the button labeled **Continue**.

4. A box will appear asking you to enter your password. This is the password that you use when logging in to your computer, not the password associated with your CSU ID. Enter your local password and click **OK**.

You should now be connected.
