Tips to keep you and your family safe when you are home from college.

**Before you travel...**
- Start to decrease your social contacts 7-14 days before coming home.
- Monitor for any COVID-19 symptoms like fever, cough, body aches, etc.
- If your school offers voluntary testing, get tested a few days before traveling home.

**While you travel...**
- Wear a face mask when you are within 6 feet of another person.
- Control your environment by keeping your distance from others when possible.
- Use hand sanitizer or wash your hands often, especially after touching high-contact surfaces (door handles, countertops, etc.).

**After you get home...**
- If possible, sleep in a separate room and use a separate bathroom from others.
- Do not share drinking glasses, dishes, or eating utensils with others unless they have been washed.
- In your home, wear a mask when around elderly or immune compromised individuals.
- When in public, continue to wear your mask, wash your hands and social distance.

Tips to keep you and your family safe when you are home from college.

Test result status...

POSITIVE TEST RESULT

While you travel...

- Avoid being within 6 feet of another person while in isolation.
- Do not use airlines, trains, buses, other public transportation or rideshare services while in isolation – travel by personal car only.
- Use hand sanitizer or wash your hands often, especially after touching high-contact surfaces (door handles, countertops, etc.).

After you get home...

- Isolate at home, sleep in a separate room and use a separate bathroom from others in the household.
- Do not share drinking glasses, dishes, or eating utensils with others unless they have been washed.
- In your home, avoid being within 6 feet of another person and wear a mask if you are in the same room as other family members.
