## 2024 SUMMER RESEARCH EXPERIENCE FOR UNDERGRADUATES

### MICHIGAN SEMICONDUCTOR HANDS-ON RESEARCH EXPERIENCE

*"My favorite part was probably honestly stepping into the clean room for the first time. I never saw myself in that position of being like, this is a room where research happens...."*

The 10-week REU projects will focus on research enabled by the University of Michigan Lurie Nanofabrication Facility. Projects are supervised and mentored by U-M faculty and graduate students, and will address key research challenges in semiconductor materials and devices.
