

## Automated Garage Access for Permit Holders

New equipment and access points for permit holders are installed in South Garage. Permit holders will scan or “wave” their Viking Cards in front of the card reader (see photo below) when entering and exiting the garages – no more swiping. The card reader is located below the LED screen on the left hand side. The small red light will flash green when a valid card is read and the gate will rise.

If your card does not work, please contact Parking by pressing the HELP button, located on the upper right hand side of the machine.

Remember to keep your Viking Card in sync by always scanning near the reader when entering and exiting the garage.
