How to access “4csuuseonly” wireless on Mac OS X

If your computer is running Mac OS X Snow Leopard (version 10.6.x) use the section of this Guide titled Configuring Wi-Fi in Mac OS X Snow Leopard. If your computer is running Mac OS X Lion or above (version 10.7+) use the section of this guide titled Configuring Wi-Fi in Mac OS X.

Configuring Wi-Fi in Mac OS X Snow Leopard:

1. Open the System Preferences application through the Apple menu in the upper left hand corner of the screen in the menu bar and select System Preferences from the drop down menu.

2. Click on the Network icon in the System Preferences window.
3. Click on the button labeled **Turn AirPort On**. In the drop down list select **Join Other Network**.

4. Click on the button labeled **Show Networks**.
5. Click on the network labeled 4csuuseonly. In the text box labeled **User Name:** enter your **CSU ID Number.** In the text box labeled **Password:** enter your **CampusNet Password.** Select **Automatic** from the drop down list labeled **802.1X:** and then click on the button labeled **Join.**

6. At this point, you will need to restart your computer to continue setting up your computer.

7. After your computer restarts, follow steps one and two to get back to the **Network Preferences** window.

8. Click on the button labeled **Advanced** in the lower right corner of the window.
9. Click on the tab labeled **802.1X**.

10. Select the profile user profile named **WPA: 4csuuseonly**. In the box labeled **Authentication** uncheck all boxes except for **PEAP**. Click on the button labeled **OK** in the lower right corner of the window.
11. Click on the button labeled **Apply** in the lower right corner of the window. Then click on the button labeled **Connect** next to the label **802.1X: WPA: 4csuuseonly** to authenticate your credentials.

13. A window will appear titled **Verify Certificate**. One of two server names will appear in the window, “acs-wow.csuohio.edu” or “backup-wow.csuohio.edu”. Click on the button labeled **Continue**.

14. A box will appear asking you to enter your password (this is the password that you use when you login into your computer, **NOT** your CampusNet password) to make changes. Click **OK**.

You are now connected to Cleveland State University’s secure wireless network.
Configuring Wi-Fi in Mac OS X:

1. Open the **System Preferences** application through the **Apple** menu in the upper left hand corner of the screen in the menu bar and select **System Preferences** from the drop down menu.

2. Click on the **Network** icon in the **System Preferences** window.
3. Click on the button labeled **Turn Wi-Fi On** if Wi-Fi is not already on.

4. Select **4csuuseonly** from the drop down list labeled **Network Name**.
5. Enter your CSU ID Number in the text box labeled Username. Enter your CampusNet Password in the text box labeled Password. Then click on the button labeled Join to join 4csuuseonly.

6. In a few seconds a window will appear titled Verify Certificate. One of two server names will appear in the window, “acs-wow.csuohio.edu” or “backup-wow.csuohio.edu”. Click on the button labeled Continue.

8. A box will appear asking you to enter your password (this is the password that you use when you login into your computer, NOT your CampusNet password) to make changes. Click on the button labeled Update Settings.

You are now connected to Cleveland State University’s secure wireless network.
